

## Installation Instructions – Qi-charger for Saab 9-3NG

Step 1. Remove the rubber mat in the pocket (2) by gently pulling it out

Step 2. Pull out the pocket (2) in front of the gear lever by gently pulling the clips holding it in place while gently pulling it out, wiggling from side to side.

Step 3. Pull out the bracket containing (1) the Cigarette Lighter socket and leave it hanging free so that you can reach the cables going to the cigarette lighter socket.

Step 4. Crimp the two quick connectors onto the two cables going to the cigarette lighter and make sure they make contact with the conductor.

Step 5. Put the Qi-charger in the pocket and pull the wires through the hole on the back side.

Step 6. Crimp the flat connectors onto the black and red cable and make sure they sit properly.

Step 7. Connect the black wire from the Qi-charger to the black wire going to the Cigarette Lighter Socket.

Step 8. Connect the red wire from the Qi-charger to the Violet / Blue cable going to the Cigarette Lighter Socket.

Step 9. Mount everything back together and lay the Qi-charger in place. Once finished, it will look like in the figure below.
